27/2/2020

PETZL are aware of the product referred to in the (UK) Arb Associations Safety Bulletin dated the 21st of February 2020 Ref. No. UAG065. The product had been sent back to PETZL in late December 2019 for full analysis. The analysis that was reported to the customer in January 2020 showed there were no broken parts and no manufacturing defect with the product, but it was found to be a maintenance issue.

PETZL would like to remind all users how to care for your ZIGZAG to maintain the function and prolong the lifetime of your product.

All information about the specific instructions on inspecting, checking and maintaining can be found on [PETZL.com](http://PETZL.com).

4. Tips for maintaining your equipment.

# ZIGZAG® PLUS

Mechanical Prusik with high-efficiency swivel, for tree care

The ZIGZAG PLUS mechanical Prusik allows the user to move around efficiently in a tree using classic Prusik pulley system technique. The friction chain provides precision and fluidity when moving around. The pulley is mounted on sealed ball bearings to allow the slack to be taken up easily. Can be used on either doubled ropes or a single rope, providing great versatility. The lower attachment hole with high-efficiency swivel ensures stable and correct positioning of the mechanical Prusik and optimal rope glide through the device.
