

The Arb-Ex is an Air Excavation tool specifically a designed for use around tree roots.

Its ergonomically designed so its can be used for long periods and small enough to get into and below roots.

The Arb-Ex has quick change nozzles:

- Precision – Enables you to safely remove soil from around the smallest roots.
- Power – Allows rapid removal of soil.
- Decompaction - This nozzle is designed to gently decompaction and mix in organic matter, helping improve rooting potential.
