

Level 2 Certificate in Arboriculture

September 2020 Intake

Pre-requisites: it is strongly recommended that applicants are already practicing arborists or gain experience within the arboricultural industry during their year of study.

Awarding body: ABC Awards.

Assessment type: Portfolio of evidence.

Venue: Tree Life Training Centre in Syston, Leicestershire.

Length of course: approximately 1 year within a traditional academic term timetable. This will be in the form of 11 sessions running from 9.30am to 4.30pm on a Monday, with additional online portal guidance.

Support is continued for a further year.

Moderation will occur 1 year after the course starts.

Units Covered:

Five Mandatory Theory Units:

1. The interaction of soil environments and woody plants
2. Woody plant physiology
3. The supply planting and aftercare of woody plants
4. Principles of tree surgery operations
5. Tree inspections and statute and common law applied to trees

One of the following Optional Units:

1. The principles of aerial tree surgery and ground based arboricultural operations
2. Principles of woodlands, forestry and ecology.
3. The principles of managing special trees
4. Principles of tree surgery equipment use and maintenance
