

Careers in Arboriculture

DO YOU LIKE CLIMBING TREES?

You can do this and many other jobs as a tree care professional. Every urban tree you see each day is there because of the work of a long chain of professionals working in different areas of arboriculture. Here are some examples of jobs in the tree care community:

Researcher

New technology and to develop breakthroughs

Trainer

Share knowledge and educate the next generation

Tree officer

Responsible for all local authority trees, they're the 'Guardians of the Canopy'

Climber

Climbing and carrying out tree work is dangerous, highly-skilled technicians are in demand

Business owner

Professional contractors range from small teams to UK-wide firms with regional depots

Consultant

Reach the highest level, many provide expert witness advice on criminal and civil cases

Tree production

The nursery industry produces all of the amenity trees we plant

Planning tree officers

Responsible for managing trees in development sites and protecting important specimens with Tree Preservation Orders

Policymakers

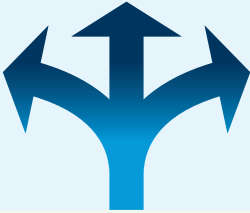

Writing and contributing to local, national and international policies ensuring trees are a top priority
